madanetirth@gmail.com

SKILLS

- ❖ **Programming Languages:** Python, C++
- ❖ **Libraries:** NumPy, Pandas, Matplotlib, Seaborn
- ❖ **Data Visualization:** Power BI, Tableau, Excel
- ❖ **Fundamentals:** OOP, DBMS, Data Mining
- ❖ **Databases:** MySQL, MongoDB
- ❖ **UI/UX Development:** Canva, Figma, PowerPoint
- ❖ **Tools & Software:** Jupyter Notebook, Git, VS Code
- ❖ **Mathematics for AI** - Probability, Linear Algebra, Calculus
- ❖ **Machine Learning:**
 - Supervised Learning – Linear Regression, Logistic Regression, Naive Bayes, KNN, Decision Trees
 - Unsupervised Learning - K-Means, DBSCAN, PCA
- ❖ **Frontend Development** - HTML, CSS, JS
- ❖ **Basics of Deep Learning**

ADDITIONAL SKILLS

- ❖ **Leadership & Team Collaboration :** Work in a team for different projects as well as lead the team to achieve the goal.
- ❖ **Communication & Presentation Skills:** In (SDI) Solar Decathlon India competition during this I also presented our product design & its concept to 2-3 companies for partnership with our team.
- ❖ **Problem Solving:** I have ability to solve real world problems like currently applying analytical and technical skills while working on a major project
- ❖ **Time Management:** Completing all day to day work of college as well as while managing it with internship work and projects

EDUCATION

❖ B.Tech Degree in Computer Engineering

Shah And Anchor Kutchhi Engineering College, Mumbai (Aug 2023 - June 2027)

CGPA: 8.84

❖ Pursuing Honours in Data Science

CGPA: 10

AWARDS

❖ Finalist – Solar Decathlon India

Competition: Selected for the national-level competition with an IoT-based Cooling Retrofit Model developed during a 6-month in house college internship.

LANGUAGES

- ❖ English
- ❖ Hindi
- ❖ Marathi
- ❖ German (Currently Learning)

PROJECTS

❖ **Vyaas** — *Crop Prediction System*

Developed a Python-based system for farmers to predict suitable Ayurvedic and regular crops based on soil type and environmental parameters. The project used reinforcement learning techniques to analyze data and provide intelligent crop recommendations.

❖ **Infosys internship Project** - *Hotel Revenue Analysis*

Performed hotel revenue analysis using Power BI, creating interactive dashboards and visualizations to analyze booking trends, occupancy rates, and revenue performance.

❖ **UIDAI Hackathon** – *Aadhaar Data Analysis & Prediction*

Worked on data preprocessing, Power BI visualization, and built a prediction model using Linear Regression to analyze Aadhaar-related data and generate insights

❖ **Loan Approval System**

Built an XGBoost-based ML model to predict loan approvals using applicant details; performed preprocessing, feature engineering, and achieved high accuracy for automated decision-making.

EXPERIENCE

❖ **Infosys Springboard internship** - *Data visualization intern (Remote)* **(DEC 2025 - FEB 2026)**

worked on Data Visualization & Analysis using Power BI

TRAINING & CERTIFICATES

❖ **Google AI/ML Virtual Internship** : Learned basic concepts of ML and worked on Tensorflow framework , Pandas , Matplotlib , Numpy

❖ **AWS Cloud Practitioner Essentials (AWS Training & Certification):**
Learned EC2 instances, Auto Scaling, Load Balancers, S3 buckets, and Docker basics for efficient cloud management and deployment.

❖ **Tata – GenAI Powered Data Analytics Job Simulation (Forage):**
Completed a real world analytics simulation focused on data interpretation, visualization, and AI-powered insights for business decision-making.

❖ **Lloyds Banking Group – Data Science Job Simulation (Forage):**
Completed a real-world customer churn prediction project involving data preprocessing, exploratory data analysis, and machine learning model selection to derive actionable business insights.

POSITION OF

RESPONSIBILITY

- ❖ Member of Robo Club
- ❖ Volunteer at NSS
- ❖ CO-HEAD of PR & Marketing in IEI
